

UNIVERSAL CONTROL PLANE: IT-Only SaaS^{-blue}, IT/OT SCADA^{-orange}

Same Four Pillars - Different Risk Contexts: IT-Only vs IT/OT Convergence

Scenario legend:

● Blue Path = IT Only (Salesforce SaaS) ● Orange Path = IT/OT Convergence (Field Engineer → SCADA HMI)

KEY INSIGHT: Same pillars, different complexity.

→ OT adds safety checks, tiered auth, identity mapping, and air-gap boundaries, however, the universal control plane remains consistent.
